## **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 1-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Foulger et al.,., (6,578,022).

As per claim 1, Foulger et al., teaches a method for allowing concept based information searching comprising the steps of:

- (a) collecting textual information using a network (Col.17, lines 16-23);
- (b) parsing the textual information for creating topic specific information packets (Col.16, lines 9-26);
- (c) storing the information packets in an information cache (Col.3, lines 53-58);
  - (d) receiving a query from a user (Col.16, lines 9-12);
- (e) parsing the user query and comparing the parsed user query with the information packets in the information cache to locate matching information packets (Col.22, line 63 Col.23, line 3); and,

Art Unit: 2654

(f) displaying the matching information packets to a user (Col.3, lines 46-52).

As per claim 2, Foulger et al., teaches the method as recited in claim 1, wherein the query into an internal query form (Col.16, lines 9-26).

As per claim 3, Foulger et al., teaches the method of claim 1, wherein the user inputs the query in natural language (Col.22, lines 49-54).

As per claim 4, Foulger et al., teaches the method as recited in claim 1, further comprising the steps of executing a network search, performing a search of information sources responsive to the user query, and outputting information matching the user query to the user if the user query is not understood (Col.17, lines 33-48).

As per claim 5, Foulger et al., teaches the method as recited in claim 1, wherein the formatted information includes a hyperlink to the original source of the textual information (Col.6, lines 43-62).

Claims 6-10 are directed to a computer program embodied on a computer readable medium to implement the steps of method claims 1-5, and are similar in scope and content, and are rejected under similar rationale.

Claims 11-15, are apparatus claims implementing the method of claims 1-5, and are similar in scope and content, and are rejected under similar rationale.

## Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Marchisio (6,510,406) teaches an inference engine for high performance web search.

Snyder et al., (6,038,561) teach management and analysis of document information text.

Arnold et al., (6,745,161) teaches system and method for incorporating concept based retrieval within Boolean search engines.

Preston (6,446,081) teaches data input and retrieval apparatus.

Appelt et al., (6,601,0260 teach information retrieval by natural language querying.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vijay B. Chawan whose telephone number is (703) 305-3836. The examiner can normally be reached on Monday Through Thursday 7-4.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richemond Dorvil can be reached on (703) 305-9645. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
